

Baltimore City Public Schools – Baltimore, Maryland

[CHALLENGE]

Baltimore City Public Schools needed to convert an existing elementary school to a high school. The project required adding a 2,160-square foot locker room facility for the varsity athletics. The building had to be delivered and installed during the summer.

[SOLUTION]

Modular Genius, Inc. delivered and installed the 2,160 square foot facility in 45 days. Work consisted of permits, engineering, electric, plumbing, foundation and entrance means. The project was delivered on time and within budget.
