
Modular Daycare Center for Hospital

Beaufort, SC

The Challenge

Beaufort Memorial Hospital required a high-quality, fully equipped daycare center to accommodate the children of hospital staff. The facility needed to include multiple classrooms with age-appropriate restrooms, administrative offices, a kitchen for meal preparation, and laundry facilities. The hospital sought a custom, turnkey modular solution that would provide a safe, functional, and compliant environment while minimizing disruption to hospital operations.

The Solution

Modular Genius designed and delivered a 6,336 sq. ft. modular daycare center, providing a seamless turnkey solution tailored to the hospital's needs. The facility includes five classrooms, each with individual children's restrooms, ensuring a safe and convenient layout. Additional features include single-occupant adult restrooms, a reception area, office space, a kitchen for preparing meals, and dedicated laundry facilities. The building was constructed to meet all applicable building codes and safety regulations, ensuring a secure and comfortable environment for children and staff. The modular approach allowed for a faster installation with minimal on-site disruption, providing Beaufort Memorial Hospital with a high-quality daycare facility in a fraction of the time required for traditional construction.
