

City Municipal Services Supervisory Modular Office

Washington, D.C.

The Challenge

The District of Columbia's Office of Contracting and Procurement, on behalf of the Department of Public Works (DPW), was seeing a contractor to provide, outfit, deliver, and install a fully functional modular office. The supervisory office will support DPW Disposal operations located at the District's Fort Totten Solid Waste Transfer Station. The supervisory modular was be sited in the yard of the facility. DPW required an expedited delivery solution within 60 calendar days of contractor selection.

The Solution

DPW's mission is to provide environmentally healthy municipal services that are both ecologically sound and cost effective by ensuring the cleanliness of the District's residential neighborhoods, high-visibility commercial areas, gateway corridors and industrial zones through a combination of direct services, education, and enforcement. The new 36x60 modular office was installed at Fort Totten to accommodate the overflow of staff and provide a more efficient operation. The project was completed on time and included appliances in the kitchen with functional office space fully wired for data communications. Prefabricated aluminum steps and ramps were installed for access.
