

Department of Public Works Modular Office

Carroll County, Maryland

The Challenge

A County Government in Maryland required approximately 2000 sqft of office space within a landfill site. A 25 year life expectancy and the ability to relocate in the future was a high priority.

The Solution

Modular Genius designed and installed a 2,272 sqft gabled modular office building. Steel siding along with a traditional shingled roof provided durability as well as a visually pleasing modular structure.
