

# Religious Private School Modular Classrooms

Milton, DE

## The Challenge

A religious private school in Milton, DE needed additional classroom space due to increased enrollment. They wanted to install the building over the summer while school was out, so the building would be ready by the next school year.

## The Solution

Modular Genius was able to source a building that met the school's requirements. Modular Genius provided sealed engineer drawings for permit submission. Our construction services team installed the modular building, and the client was able to occupy the building before the beginning of the school year.
