

Modular Educational Nature Center

Pasadena, MD

The Challenge

A local public school system needed a meeting space for an educational nature program for elementary school students hosted at a local park. They were able to work directly with Modular Genius through the Keystone Purchasing Network to procure the new modular classroom for the site.

The Solution

Modular Genius, Inc. built and installed a 480 sq. ft. modular classroom featuring vinyl tile flooring, vinyl covered gypsum walls, and exterior smart panel siding in light green with a color coordinating darker trim. The project also features ADA compliant ramps and steps as well as an asphalt walkway from the ramp to the pre-existing walking path.
