

## Relocatable Modular Classroom Building in New Jersey

Riverside Township, NJ

### The Challenge

Riverside Township Public School District in Riverside, NJ, required additional classroom space to accommodate growing enrollment. The district needed a fast, cost-effective solution that would integrate with the existing campus while complying with local building codes and educational facility requirements. The new space needed to be fully functional, ADA-compliant, and equipped with HVAC, restroom facilities, and classroom storage, all within a tight timeline to avoid disrupting the academic calendar.

### The Solution

Modular Genius delivered an 11,120 square foot relocatable classroom building composed of eleven modules, seamlessly integrated on the Riverside Township school campus. The single-story structure features bright, spacious classrooms with built-in cubbies and cabinetry, ADA-compliant restrooms with full tile finishes, and centralized HVAC for comfort throughout the year. Wrapped in red siding with stone skirting, the building presents a clean, modern appearance that complements the existing school. Fully code-compliant and backed by a 12-month warranty, the modular building was completed quickly and efficiently, providing the district with a turnkey educational facility ready for immediate use.
