

## Dual Modular Classroom Buildings

Springdale, MD

### The Challenge

Ardmore Elementary School in Springdale, MD, faced a need for additional classroom space to accommodate a growing student population. The school required a fast and cost-effective solution that would minimize disruption to daily operations while providing a high-quality learning environment.

### The Solution

Modular Genius provided two 24' x 36' modular classroom buildings, delivering a turnkey solution that met the school's space requirements efficiently. The buildings were designed to match the existing school facilities and included HVAC systems, energy-efficient lighting, and durable interior finishes to ensure comfort and longevity. The modular units were installed and made operational in a short timeframe, adhering to local building codes and educational facility standards. This solution provided Ardmore Elementary School with the necessary classroom space while maintaining a seamless integration with the existing campus.
