

## Modular Classroom Buildings Delivered for Saginaw County Schools

Saginaw, MI

### The Challenge

Saginaw County Schools required additional classroom space at two elementary school campuses, Westdale Elementary and Weiss Elementary, to support their growing student populations. The district needed a solution that could be delivered efficiently while providing safe, accessible learning environments for students and staff. Minimizing disruption to ongoing school operations and ensuring compliance with accessibility requirements were key priorities.

### The Solution

Modular Genius delivered two modular classroom buildings to serve the Westdale and Weiss Elementary campuses. Each building was designed to provide functional, comfortable learning environments equipped for daily educational use. The classrooms were installed with accessibility in mind, supporting inclusive learning for all students.

By utilizing modular construction, Saginaw County Schools were able to quickly expand their capacity with minimal disruption to school operations. The result was a reliable, efficient solution that met immediate space needs while maintaining a high standard for educational environments.
