US Coast Guard Headquarters

Washington, DC

The Challenge

Creating the largest construction job since the Pentagon in 1940 the Federal Government is renovating and expanding upon former St. Elizabeth's Hospital. This 4.5 million sq ft campus will house the Headquarters for the US Department of Homeland Security, US Coast Guard and 22 other agencies. During the construction of this mini city workers needed to be housed in modular buildings.

The Solution

Modular Genius was selected by the Prime Contractor and the Construction Manager of this project to provide over 23,000 sq ft of modular office buildings. What was so unique about the accomplishment is that was completed on time, on budget and occurred during the blizzard of 2009-2010 with a record snow fall of nearly 4 feet.
