

Modular Swing Space

Maryland, USA

The Challenge

A government agency in the process of a major building replacement needed to move its employees to an interim facility..

The Solution

Modular Genius provided a 9,000 sqft, LEED Silver, slab on grade, permanent modular building. Large open work spaces, along with multiple offices, conference and break rooms, allow the agency to efficiently continue their work. The exterior conforms with the styles of surrounding buildings and will continue to be used after the main construction project is completed.
