

Wellness Center Modular Clinic

Hurlock, MD

The Challenge

A Maryland School District needed to find new classroom space in a quickly expanding high school. Moving the health-care clinic to a stand alone modular building outside of the main school was a fast temporary solution, allowing the required space reconfiguration inside of the school.

The Solution

Modular Genius was able to build the modular healthcare facility to meet their specific needs. A 1,440 sqft modular wellness center building was built, delivered, and installed on site in approximately 60 days from contract to completion.
