VA Medical Center Modular Eye Clinic

Decatur, GA

The Challenge

The US Department of Veterans Affairs hospital in Georgia was in need of additional space to expand their eye clinic. There was no more room inside the hospital for the expansion. Modular Construction had been decided as the most expeditious way to expand the clinic.

The Solution

A Service disabled veteran contractor partnered with Modular Genius and built the 2,880 sq ft modular addition. It was attached to the existing hospital. The modular building was constructed with non-combustible materials. The hospital walls were cut out for expansion so one could walk from the existing hospital into the modular addition on the same floor without obstruction. The construction of the modular building and installation was complete in 120 days from award to occupancy.
