

Modular Scale House

New Market, MD

The Challenge

The Maryland State Highway Administration needed to replace an old administrative building used as a weigh station on a busy state highway. The building had to be custom built to meet the specific needs of scale house.

The Solution

Modular Genius, Inc. built a new 840 square foot building. The new building had far better energy consumption compared to the old with LED lights and a higher SER HVAC unit. The project was delivered and installed in 90 days of award.
